Jondaryan Angus has been breeding Angus cattle for the past 14 years except for a two year break period. We are producing bulls to meet the commercial market so as the cattle produced continues to improve the all important bottom line and your herd. We are aiming to produce good bulls with good temperament, structural, and E.B.V's at a fair commercial investment.

The bulls on offer have all come from Peakes Bowen females which were selected after a complete sale of all Jondaryan Angus cattle (366 head) in 2015. We believe these cattle will serve you well and even after a very poor two years in weather conditions they are all in good condition and ready to work. They have not been on forced feed to prepare them for sale. They are good solid quality bulls, with solid breeding behind them and ready to work. Weights will be available on sale day. BULL VACINATIONS - Tick fever, 7 in one, and Vibrio.

All bulls are D.N.A. verified and presented for sale with a wash and small clean up. You can purchase with confidence in the bloodlines offered.

Denis Davey - M: 0412 770 363 E: info@jondaryanangus.com.au

Stephen & Jodi along with sons Nick & Josh operate PEAKES BOWEN ANGUS - We are a family owned & operated business with beef cattle production being our sole source of income. We are proud to present a quality line of Angus bulls. These bulls are bred from a cow herd base of 350 angus females, that must perform on native grass country. Structural soundness, fertility & doing

ability are a paramount focus to our selection criteria. Our cow herd achieved a 97% pregnancy rate despite the drought & near record heat.

We have successfully sold Poll Hereford bulls for many years to Birdsville, Alice springs. Our Angus bulls go under the same strict selection programme as our Herefords. Our Angus bulls have been sold to Stations at Camooweal, St George, and around Barcardine. John Poulson and family from St George joined 3 of our angus bulls to 252 heifers for 8 weeks for an 88% conception rate [fantastic result given season, and joining percentage]

It is a great time to upgrade your sires & plan for the future.

Stephen, Jodi, Ros, Josh, Nick & Kim Peake

Health Peakes Angus

All bulls have been vaccinated, Blooded, Botulism x 2 doses, 7 in 1 x 2 doses, Vibrio x 2 doses, BEF [three day sickness] 2 x doses, Pesti guard x 2 doses [all bulls tested PI free], Cydectin pour on.

Stephen Peake,

Brown Mountain Angus returns to Queensland this year offering 15 exceptionally quiet, quality bulls with the majority being excellent for heifer joinings.

Sired by the #1 Marbling bull on Breedplan, Hazeldeane F1023 (6.1 IMF), Rennyalea G35 (5.3IMF) and Glenoch Galleon G57, all bulls have been Sire Verified and genotyped giving you greater confidence in their predicted performance.

They have well balanced data, focused on calving ease, competitive growth and offer excellent carcass traits. They have been structurally assessed by Liam Cardile, Vet Checked – guaranteed fit for breeding by Shane Thomson, Holbrook Vets, Tested PI negative and vaccinated for Tick Fever, 3 day Sickness, Vibrio, 7 in 1.

Bulls have been prepared for sale using a grass PCAS pellet (no grain) and hay/silage.

They are leaving for Queensland mid August and will be in a feedlot for a 6 week period pre- sale to acclimatize.

E: brownmountainangus@bigpond.com | www.brownmountainangus.com.au

Alloura Angus Stud based at Yass in New South Wales is one of the highest marbling Angus herds on Angus Breedplan. Alloura is offering twenty bulls specially selected for the Taroom Sale.

The Alloura bulls offer calving ease (with 3 X bulls in top 1% of the Angus breed, 12 X bulls in top 10% for calving ease), low-moderate birth-weights, lower mature cow weights, better than breed average growth profiles and exceptional carcass quality (all bulls in top 15% and 14 bulls in the top 5% of the Angus Breed for IMF).

Many of the Alloura bulls are suitable for joining with heifers. Four of the bulls have all four \$ indexes in the top 5% of the Angus Breed. Alloura Angus is the home of the super marbling sire Alloura Get Cracking G10, and this sale includes a number of his sons.

The Alloura bulls are all registered with Angus Australia, all are fully Breedplan recorded (including Genomics), independently structurally assessed, vet checked and freeze branded. The bulls have been grown out in Qld and have been tested and treated for ticks, botulism, pestivirus (non-carrier), 3-day sickness, Vibriosis and 7-in-1 vaccinated.

The Alloura bulls offer a great opportunity to access new genetics to accelerate your herd improvement and increase carcass quality, particularly marbling.

Kurra-Wirra Caribbean G98

Kurra-Wirra is excited to be on the Leachman Cattle of Colorado's \$Profit Database. The Leachman analysis currently includes over 1 million cattle worldwide.

\$Profit tells you which bulls' calves make you the most profit, from birth to slaughter if you retain ownership and keep replacements. It includes the cow traits, fertility, growth, carcass and feed-intake. Isn't that really what you want to know?

Kurra-Wirra Shadow Boxer GRTJ191

It basically balances all the revenue traits (calving ease, growth rates, fertility, carcass weight, marbling, ribeye area and retail yield) against the cost of production traits (mature cow size, feed intake and feed efficiency).

For more information, see the last page in the catalogue

The four most important reasons why the Beef industry uses KW bulls –

1. Environmental suitability: Red coated slick bulls are cooler and more heat tolerant, resulting in higher fertility equalling more calves.
2. More Weight: Calves have more weight at a younger age and as one client manager quoted "they look like steers but weigh like bullocks". They are 100% Bos Taurus polled cattle that are a great cross breeding option with hybrid vigor.
3. Fertility: Cattleman are using KW bulls for their proven higher fertility resulting in more calves for more dollars.
4. More Markets: These KW Red Senegus genetics are 'Slick Coated' and 'Flat Backed' that are suitable for the northern export market, with the added bonus of providing a diverse range of premium market options for more dollars in your bank.

Vet checked, Vaccinated Three Day, Tick Fever, Botulism, Vibrio, 7 in 1, Pestivirus.

Notes: -
 Like both bloodlines with some excellent background. Will serve you well and again still has some growth left in him.

Purchaser..... \$.....

A BRIEF DESCRIPTION OF EBVS AND \$INDEX VALUES

The following is a brief description of EBVs and \$Index values and Accuracies. For a more detailed explanation please refer to Angus Society of Australia web site (www.angusaustralia.com.au).

ACCURACY (%) ~ Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of its EBVs for particular traits will increase.

CALVING EASE DIR (%) ~ Estimates of the genetic differences between animals in the ability of their calves, from 2-year-old heifers, to be delivered without assistance.

CALVING EASE DTRS (%) ~ Estimates of the genetic differences between animals in the ability of their 2-year-old daughters to calve without assistance.

GESTATION LENGTH (DAYS) ~ Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

BIRTH WT (KG) ~ Estimates of the genetic differences between animals in calf birth weight.

200-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 600 days of age.

MATURE COW WEIGHT (KG) ~ Estimates of the genetic differences between animals in cow weight at 5 years of age.

MILK (KG) ~ Estimates of the genetic differences between animals in milk and animals in percentage retail beef yield, in a 300kg carcase.

INTRA-MUSCULAR FAT % (IMF%) ~ Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcase.

ANGUS BREEDING INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market endpoint but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems. The index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

DOMESTIC INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade, with progeny finished using either grass, grass supplemented by grain or grain finishing systems.

HEAVY GRAIN INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200-day feedlot finishing period for the grain fed high quality, highly marbled markets.

HEAVY GRASS INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished heavy steers.

Notes: 29%

His sire Rennylea G35 is ranked in top 25 highest marbling HBR Angus bulls with IMF 5.3. N108 has some powerful grandsires in his pedigree, so you would expect him to end up being very chunky. His well balanced data with above average carcass traits should leave some very easy and early finishing steers. Dam produced 10 calves in 11 years.

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in
Australia and "Happy Bidding"

-  1 Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device
-  2 Click on the "Sign Up" page / link
-  3 Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
-  4 Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
-  5 Click "Register"
-  6 You will then be notified by email that an account has been created

-  7 Once an account has been created you are all "Set to Bid"
-  8 Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
-  9 Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
-  10 The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
-  11 On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.
(There is no need for software download)
-  12 At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

Notes: 29%

Another high marbling heifer bull by G35 with Fertility traits in top 5%. Dam B73 has produced 9 calves in 10 years and remains the oldest cow still active in our herd having had to halve our cow herd in recent years due to drought. She is still 100% sound holding condition in the toughest of times. Her Sire Merrick T149 was New Zealand's top maternal sire. Dam produced 10 calves in 11 years.

THE QUEENSLAND LIVESTOCK, PROPERTY & PRODUCE BROKERS' ASSOCIATION
STUD STOCK — AUCTION TERMS AND CONDITIONS OF SALE

IMPORTANT NOTE:

All bids shall be treated as offers made upon the following Terms and Conditions of Sale and all persons present are admitted to attend the sale on the basis that they have notice of these Terms and Conditions.

1. The highest bidder shall, subject to Condition 2, be the purchaser provided that the vendor reserves the right to bid either by himself or through his agent or auctioneer and should any dispute arise among the bidders for any lot, during or immediately after sale of the lot, it shall be settled at the auctioneer's absolute discretion who may, should one of the disputants advance, put the lot or lots up again. The bidding from time to time shall be regulated by the auctioneer and no bid shall be retracted.
 2. The sale will be conducted on a "Sale" or "No Sale" basis, whereby the lot for sale shall be knocked down to the highest bidder, but the sale will be subject to the acceptance of the highest bid by the vendor who will immediately after the fall of the hammer declare "Sale" or "No sale". Should the vendor reject the bid of the highest bidder such bidder will have the right of first refusal of the lot at the vendor's nominated price for one hour after the lot has been passed out of the ring on the Terms and Conditions herein set forth in so far as they shall apply.
 3. The details of the purchaser, the purchase price and the lot sold as recorded by the Sale Clerk for and on behalf of the auctioneer shall be equally binding on both purchaser and vendor.
 4. The auctioneer expressly reserves the right, without giving any reason therefore to:—
 - (a) Refuse to acknowledge any bid;
 - (b) Withdraw any lot or lots before or during the sale;
 - (c) Exclude any person from the auction venue should it think fit.
 5. Each lot in all cases shall be at the risk and expense of the purchaser, upon acceptance of his bid by the vendor or upon acceptance of the highest bidder's offer by the vendor whichever shall be the earlier.
 6. Except as expressly provided in these Terms and Conditions of Sale no guarantee or warranty shall be given in respect of any lot sold under these conditions as to pedigree, sex, age, breeding condition or otherwise howsoever, and no guarantee, warranty or condition whatsoever shall be implied from any affirmation made before or at the time of the sale, or from any circumstances of the sale, but in all cases where a guarantee is intended the same shall attach and be enforceable only if reduced to writing before delivery of the lot and signed by the vendor or by the auctioneer acting as agent for the vendor, and the absence of such writing shall be conclusive evidence in case of dispute that no guarantee, warranty or condition whatsoever was given or implied.
 7. In the event of any dispute in respect to the sale of any lot:—
 - (i) The purchaser shall nevertheless be obliged to pay to the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions;
 - (ii) The vendor and the purchaser shall resolve the dispute between themselves;
 - (iii) The auctioneer shall have no liability or responsibility in regard to the dispute; and
 - (iv) No lot shall be returned to the auctioneer and the purchaser shall indemnify the auctioneer for all costs, expenses and damages which the auctioneer is put to or incurs by reason of the purchaser so doing.
 8. The name of the vendor for whom the auctioneer acts is acknowledged to have been furnished to purchasers prior to sale and further particulars will in all cases be furnished to a purchaser if required. In the case of any dispute the remedy of the purchaser shall be against the vendor only and in no case or under any circumstances against the auctioneer who is to be regarded for all intents and purposes as agent for a disclosed principal.
 9. (a) **PAYMENT** — Unless prior credit arrangements have been made in writing with the auctioneer the full purchase price for each lot shall be due and payable to the auctioneer in cash upon acceptance of the highest bid or the highest bidder's offer by the vendor and prior to delivery. Notwithstanding that delivery is given to or possession obtained by the purchaser or his representative prior to the payment of the purchase money in full the property in any lot which is sold shall not pass to the purchaser until the full purchase price and all cheques, promissory notes, bills of exchange, acceptance orders or drafts given in connection with such payment have been paid and liquidated and until property shall pass, the purchaser shall hold such lot as Bailee, provided that in all cases should such payment not have been made and liquidated within 14 days of the date of the sale the auctioneer reserves the right to:—
 - (i) Rescind the contract on behalf of the vendor and repossess and resell any lot;
 - (ii) Recover from the purchaser interest upon the purchase price at a rate per annum which aggregates the AMBA Bill Rate and two percentum. For the purposes of this condition, the expression "The AMBA Bill Rate" is the rate published by the Australian Merchant Bankers' Association in good faith as at the date of the sale as its Bill Rate for 180 day Bills of Exchange expressed as a percentage per annum. If at any time the AMBA Bill Rate becomes unavailable for any reason, the auctioneer shall determine and advise the purchaser of the interest rate to apply for the purpose of this condition.
 - (b) The auctioneer is selling as the del credere agent of the vendor and the full purchase price of any lot sold shall be payable by the purchaser to the auctioneer and be fully recoverable by the auctioneer in its own name.
10. If the purchaser shall neglect or fail to comply with any of the within conditions any lot purchased by him may be immediately resold by Public Auction or Private Contract, with or without notice, at the risk of the former purchaser, who will be held responsible for all loss and expenses arising out of such resale, and shall not participate in any profit accruing therefrom.
 11. Any vendor or purchaser removing the Sale Number from any lot after it has been sold will fully indemnify all affected parties for any loss, costs or damages should the lot be wrongly delivered.
 12. The purchasers, if more than one, shall be jointly and severally bound by these Terms and Conditions and shall jointly and severally carry out and perform sale.
 13. Any person who advances a bid on a lot shall do so on the expressed condition and understanding that should that person's bid be the highest bid and such bid is accepted by the vendor, then that person will be held personally liable for the price so agreed upon, regardless of the fact that that person may be acting on behalf of another party, either disclosed or undisclosed to the vendor or the auctioneer, provided however that this condition shall not in any way negate the vendor's right to claim against any principal and in such case the bidder's liability shall be construed to be by way of guarantee.
 14. The auctioneer may, should it think fit, make arrangements on a purchaser's behalf, for the feeding, watering, trucking, shipping of and general attendance to any lot after sale but no responsibility will be accepted by the auctioneer and all such service will be at the purchaser's risk and expense.
 15. No lot will be delivered until the sales invoice has been checked and signed by the purchaser or his duly authorised representative.
 16. (a) Each lot in all cases shall be sold with all faults, if any, and excepting those conditions and warranties implied by the Trades Practices Act or any applicable State legislation which cannot be contractually excluded and excepting conditions and warranties expressly contained in these Terms and Conditions of Sale, any express or implied condition, statement or warranty, statutory or otherwise, is hereby excluded. The auctioneer is not liable in respect of any error, misdescription or omission in any particulars appearing or stated regarding the description or pedigrees of any lot offered for sale and no such error, misdescription or omission shall entitle the purchaser to annul the sale or reject the lot or claim any compensation, damage or abatement in price.
 - (b) Each lot will be sold subject to passing all veterinary tests required by the law of the State or country to which the purchaser intends to transport that particular lot, such tests to be undertaken at the purchaser's expense and concluded immediately following the sale. In the event of a lot failing to pass these tests, the sale shall be null and void, any purchase moneys paid by the purchaser shall be refunded and property in the lot shall revert to or remain with the vendor.
17. **GUARANTEES OF FERTILITY**
 17. 1 **BULLS.** Save and except for calves at foot, all bulls are guaranteed breeders and to so prove within six months of the date of sale or by reaching the age of 30 months, whichever date shall be later.
 17. 2 **FEMALES.** Save and except for calves at foot, all females are guaranteed to be in calf or go into calf within six months of the date of sale or by the age of 30 months whichever date shall be later. A positive pregnancy test certified by a qualified veterinary surgeon shall be sufficient evidence that the animal is in calf.
 17. 3 **Claims under clauses 17.1 and 17.2** guarantees of fertility shall be made to the vendor within six months from the date of sale or prior to the animal entering a quarantine area other than on the vendor's property.
 17. 3 1 All claims must be accompanied by a veterinary certificate which shall clearly identify the basis of the claim.
 17. 3 2 Infertility resulting from injury or disease occurring after the sale of the animal shall not be covered by this guarantee.
 17. 3 3 The vendor retains the right to have the animal placed on a property nominated by him or returned to his own property for further assessment of fertility for a period not exceeding six months. In the event of the animal being proven fertile within the period, the costs incurred shall be borne by the purchaser. In the event of the animal not being proven fertile within the period the costs incurred shall be borne by the vendor.
 17. 4 **LIABILITY OF A VENDOR.** Except for costs defined elsewhere in the Conditions of Sale, the liability of a vendor in respect of claims relating to fertility shall not exceed the purchase price of the animal(s) or to provide mutually agreed upon replacement animals.
 17. 5 **REFUNDS.** In the event of a claim being substantiated and the purchase price being refunded, the animal(s) shall automatically become the property of the vendor and be returned to him or disposed of according to his instructions at this expense.
 17. 6 This guarantee shall be voided by the purchaser if:—
 - (a) The animal is returned to the vendor:—
 - (i) in poor physical condition or with any injury;
 - (ii) tests carried out on behalf of the vendor within fourteen days of such return proved positive to any diseases which may affect the animal's fertility or ability to breed naturally; or
 - (b) The purchaser has collected and stored semen from a bull or embryos from a female.
 17. 7 In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the vendor and the purchaser, and the auctioneer, while he shall use his best endeavours to assist, shall have no liability or responsibility in that regard. In the event that a lot is alleged or proved not to be a breeder, the purchaser shall nevertheless be obliged to pay the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions.

18. (a) Each lot shall be at the risk of the vendor in respect of any damage or injury, whether by disease, accident or otherwise, for the period that the lot be in the custody of the auctioneer, PROVIDED THAT the auctioneer, its servants, agents and employees shall use all reasonable care to protect and control the lot while it is in the auctioneer's custody AND PROVIDED THAT when a lot has been sold, it shall be at the risk of the purchaser in all respects.
 - (b) If any vendor brings to the sale premises any lot which is dangerous, or infected with any disease, that vendor shall be liable for all injury, damages, costs, losses or expenses which the auctioneer may sustain, incur or be put to either directly or indirectly as a result of the vendor so doing. The auctioneer reserves the right, in its absolute discretion, to exclude from the sale venue or dispose of any lot which in its opinion shows signs of any disease, whether infectious, contagious or not, or of any serious fault or of being dangerous.
19. **DELIVERY.** Except at the discretion of the auctioneer, no lot shall be delivered to the purchaser unless payment of the purchase money together with any additional charges incurred including those expenses incurred by the auctioneer, pursuant to Condition 14 hereof, is first made by the purchaser to the auctioneer. Release of lots may be withheld by the auctioneer until personal cheques are cleared.
 20. In these Conditions:—
 - (a) References to "auctioneer" shall be taken to mean as the contest so admits, the Selling Agent or any member, subsidiary or related corporation or body, officer, agent or employee thereof, authorised by the vendor to conduct the sale of the lot.
 - (b) "Purchaser" shall have the meaning ascribed to it in Condition 1.
 - (c) "Vendor" shall mean the person or corporation upon whose account lots are offered for sale and where a stud or farm is named shall mean the proprietor of that stud or farm.
 - (d) "Lot" shall be taken to mean the animal offered for sale and/or sold by the auctioneer on behalf of a vendor.

CONDITIONS APPLYING TO EMBRYO AND FLUSH SALES

- 21 (a) In this condition:—
 - (i) "Embryo" means the fertilised ovum or egg produced by the donor cow and sold by the auctioneer on behalf of a vendor.
 - (ii) "Recipient cow" means the cow which is specified in the sale catalogue as the recipient of the embryo or, where no recipient cow is so specified or if the vendor in his discretion decides that another cow shall be the cow to which an embryo shall be transferred, any other cow to which the embryo is transferred at any time.
 - (iii) "Flush" means the unfertilised ova or eggs of the donor cow before those ova or eggs are fertilised by a sire recommended or to be nominated by the vendor and taken from the donor cow and transferred to any one or more surrogate cows.
 - (iv) "Surrogate cow" means the cow to which the embryo deriving from a flush is transferred at any time.
 - (v) "Sire" means the male parent specified in this sales catalogue to be the sire of an embryo or of a flush (where the flush is fertilised).
 - (vi) "Dam" means the donor cow specified in the sale catalogue as being the dam of an embryo or of a flush.
 - (b) In the event that a lot sold pursuant to these Terms and Conditions is an embryo or a flush the above general Terms and Conditions of Sale and this Condition 21 shall apply, but where any inconsistency occurs, the said general Terms and Conditions shall be varied to the extent of any such inconsistency by the provisions of this Condition 21. The definition of "Lot" contained in Condition 20 shall be read to include the embryo(s) or flush(es) offered for sale and/or sold by the auctioneer on behalf of a vendor.
 - (c) Property in the embryo or the flush shall pass to the purchaser in accordance with Conditions 9 hereof. Property in any recipient cow carrying the embryo shall pass to the purchaser:
 - (a) where the recipient cow carries the embryo as at the date which property in the embryo passes pursuant to this condition, on such date, or
 - (b) where the recipient cow does not carry the embryo as at the date which property in the embryo passes pursuant to this Condition, on such later date as the embryo is transferred to the surrogate cow.
 - (d) No sale of an embryo or a flush shall be frustrated, invalidated or otherwise affected and no reduction in the sale price or compensation or damages shall be allowable or payable by reason of:—
 - (i) the failure of the recipient cow to give birth to a live, healthy and sound calf;
 - (ii) the failure of a flush for any reason to transfer into one or more live embryos;
 - (iii) the failure of any one or more surrogate cows, hereafter carrying embryos derived from a flush sold to the purchaser, to give birth to one or more live, healthy or sound calves;
 - (iv) the death or incapacity of the surrogate cow or recipient cow, whether before or after the birth of the calf;
 - (v) the death or incapacity of the donor cow carrying the embryo or the flush at any time subsequent to the sale, and the purchaser agrees that it shall pay the full purchase price and any moneys payable to the auctioneer in accordance with these Terms and Conditions notwithstanding the occurrence of any one of the above circumstances.
 - (e) (i) Where the lot sold pursuant to these Conditions of Sale is an embryo:—
 - (a) the embryo and the recipient cow at any time carrying the embryo shall in all respects be at the risk and expense of the purchaser from the time of acceptance of his bid or acceptance of his offer by the vendor or the auctioneer on behalf of the vendor; and
 - (b) if the purchaser elects (with the consent of the vendor) to leave the lot he has purchased on the property of the vendor until a date subsequent to the sale, the vendor shall take reasonable care of the lot whilst the lot remains in the vendor's possession PROVIDED THAT the vendor's maximum liability in damages in the respect shall in all cases be limited to refunding the purchase price paid by the purchaser for the lot; and
 - (c) if the lot is specified in the sale catalogue to be located at a place other than the sale venue then the place for delivery of the lot shall be the place so specified.
 - (ii) When the lot sold pursuant to these Conditions of Sale is a flush:—
 - (a) the flush shall in all respects be at the risk and expense of the purchaser from the time of acceptance of his bid or acceptance of his offer by the vendor or the auctioneer on behalf of the vendor; and
 - (b) the vendor reserves and retains full right, power and authority in respect to the veterinary and general management of the dam carrying the flush, the embryo(s) deriving from the flush and the surrogate cow(s) to which the embryo(s) are transferred until delivery of the lot to the purchaser, such management to be at the vendor's sole discretion; and
 - (c) the vendor shall take reasonable care of the lot whilst the lot remains in the vendor's possession PROVIDED THAT the vendor's maximum liability in damages in this respect shall in all cases be limited to refunding the purchase price paid by the purchaser for the lot; and
 - (d) the vendor shall be under no obligation to deliver the lot until such time as the embryo(s) derived from the flush sold to the purchaser are transferred to the surrogate cow(s); and
 - (e) the place of delivery of the lot shall be the place where the said surrogate cow(s) are depastured following embryo transfer.
- (f) The vendor reserves the right to charge the purchaser a management fee of an amount specified by the vendor for every week or part thereof that:—
 - (i) in the case of a lot sold as an embryo, the dam carrying the embryo, or following embryo transfer, the recipient cow, or following calving, the subject calf remains in the vendor's possession; or
 - (ii) in the case of a lot sold as a flush, the dam carrying the flush, or following embryo transfer, the surrogate cow(s), or following calving, the subject calves remain in the vendor's possession.
- (g) The purchase price payable in respect to a lot comprising an embryo or a flush shall be due and payable to the auctioneer in accordance with the provisions of Condition 9 hereof.
- (h) The vendor guarantees that:—
 - (i) in the case of a sale of an embryo, the recipient cow will carry a live embryo of the sire and dam specified in the particulars contained in the sales catalogue;
 - (ii) in the case of the sale of a flush, the dam specified in the sales catalogue will produce a live flush containing a minimum of two (2) fertilised eggs.
- (i) Without prejudice to the generality of Condition 6 and unless otherwise expressly provided in these Terms and Conditions, the vendor and auctioneer provide no warranty, guarantee and make no representation as to and shall bear no responsibility in respect to:—
 - (i) the condition, fitness or suitability of the recipient cow to carry and give birth to the embryo;
 - (ii) the condition, fitness or suitability of the embryo as at the date of sale;
 - (iii) the condition, fitness or suitability of the dam carrying a flush or embryo;
 - (iv) the condition, fitness or suitability of the flush or of a surrogate cow to which an embryo deriving from a flush is transferred;
 - (v) the condition, fitness or suitability of a calf when born, whether sold as an embryo or as part of a flush;
 - (vi) the sex of the embryo or the embryo(s) deriving from a flush; or
 - (vii) the fitness or ability of the embryo, recipient cow, embryo(s) deriving from a flush or surrogate cow(s) to which such embryos are transferred, or the sire or dam of any lot, to pass veterinary tests required by the law of Queensland or the law of the State, Territory or country to which the purchaser intends to transport the lot.
- (j) Condition 17 shall not apply in respect to the sale of any lot which is an embryo or flush.

IMPORTANT NOTICE

The Selling Agent, its members, subsidiary or related corporations, officers, agents and employees for themselves and for those for whom they act while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy.

All persons who attend the sale do so entirely at their risk and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals, for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever which may occur.

THE HAMMER PRICE IS EXCLUSIVE OF GST, BUT GST WILL BE APPLIED TO THE FINAL PRICE AND INCLUDED ON THE INVOICE.

Rebate: 3% rebate will be available to outside agents introducing buyers in writing 24 hours prior to the sale and settling within 7 days. This will be strictly enforced.

Registration:

1. A number system for buyers will be used. Prospective purchasers must register their name and address and obtain their individual buying number before commencement of sale. This will be done at the agents office
2. No verbal instructions will be accepted
3. Successful purchasers must complete buyer's instruction slip.

Fertility:

1. The seller warrants that:
 - i. Bulls (except for bull calves at foot with their dame) are fertile and capable of natural service within 6 months of date of sale to the purchaser ("Warranty Period"); and
2. The seller will credit or refund the purchase price of bulls (excluding any costs and expenses of the purchaser in taking delivery):
 - i. Where the purchaser claims a bull is infertile, upon the purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring. Any refund payable by the seller will be made within 21 days following the receipt by the seller of the veterinary report and Statutory Declaration.
 - ii. Where the purchaser claims the bull is not of the parentage catalogued, upon the purchaser submitting a DNA test or blood test within the Warranty Period indicating that the animal is not of stated parentage.
 - iii. Where the term "credit" is used means the giving by the seller to the purchaser of a sum equivalent to the amount of the purchase price for use by the purchaser only in relation to the purchaser from the seller of another bull.
3. The purchaser acknowledges that the purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purposes for which they are being acquired.

Supplementary Sheet: Supplementary sheets will be provided by individual vendors on the day of the sale.

GST: GST will be added on to the purchase price of the bull at the conclusion of the sale.

Disclaimer of Warranties

The seller makes no representations or warranties regarding the state, quality or condition of the bulls offered for sale or sold. The Trade Practices Act, 1974 (Cth) and certain corresponding State Legislation imply terms, conditions and warranties into some contracts for the supply of goods and services and prohibit the exclusion, restriction and modification of such terms ("Prescribed Terms"). Except as provided by the Prescribed Terms all terms, conditions and warranties express or implied by custom, law or statute in any way relating to the state, quality or condition of the females offered for sale or sold are hereby excluded.

Limitation of Liability

Except as provided by the Prescribed Terms, the seller shall not be liable for any indirect, incidental, special and/or consequential damages including but not limited to loss of profits arising out of any reliance by the purchaser on the information or content set out in this sale catalogue and/or the quality or condition of the bulls offered for sale or sold. To the maximum extent permitted by law the seller's liability for breach of any Prescribed Term is limited at the option of the seller to:

- i. *the replacement of the bull; or*
- ii. *The supply of an equivalent bull; or*
- iii. *The payment of the cost of replacing the bull or acquiring an equivalent bull.*

Disclaimer: The information in this brochure is provided to the agents by the vendors of the livestock. Whilst the agent makes efforts to ensure that the information provided is accurate at the time of printing, the agents accept no responsibility for the accuracy, reliability or any interpretation of the information supplied in this brochure. Purchasers must ensure that they satisfy themselves that the livestock offered meets individual requirements. The vendors and or their agents do not give any warranty as to errors or omissions, if any, in these particulars which they believe to be accurate when compiled. Prospective purchasers should satisfy themselves by inspection or otherwise to the accuracy of particulars.

Leachman financial indexes allow you to HAVE IT ALL!

\$Ranch: Profit from birth through weaning. Includes:

- Fertility, Milk, Growth, Calving Ease
- Cow feed intake and mature size

\$Feeder: Profit from weaning to harvest. Includes:

- Feed conversion
- Carcass value
- Carcass weight

\$ Indexes Explained:

	Good	Better	Best
% Rank:	Average	Top 25%	Top 1%
\$Profit	\$7,204	\$9,993	\$16,829
\$Ranch	\$23	\$36	\$68
\$Feeder	\$57	\$87	\$158

\$Profit: Puts it all together. **\$Ranch + \$Feeder.**

- **One number that predicts your bottom line!**

Feed:Gain: Difference in the amount of feed a bull's progeny will consume to produce one pound of gain.

Example: A -0.50 F:G EBV means this animal's progeny will consume 1/2 pound less feed per pound of gain than would progeny of a 0.00 F:G EBV sire.

Feed Intake: Difference in feed consumption of each of a bull's progeny in a 112 day feeding period.

Example: A steer whose sire has a -100 Intake EBV will eat 100 pounds less feed in 112 days than one whose sire had a zero Intake EBV

Feed Efficiency Explained:

	Good	Better	Best
% Rank:	Average	Top 25%	Top 1%
Feed:Gain	-0.01	-0.09	-0.30
Intake	19	-5	-66

How \$Profit works

\$Profit assumes that the average commercial bull will have 100 progeny over its lifetime. Let's compare a bull with a \$10,000 \$Profit score to a bull with a \$5,000 \$Profit. The predicted difference between the bulls is \$5,000 or about \$50 per calf over the 100 calves. While females will not have the same number of progeny—their prediction is calculated the same way. The model assumes that you keep 30% of your heifers and that you retain ownership on the remainder and sell the finished animals on a carcass grid.

We calculate two other indexes—\$Ranch and \$Feeder. \$Ranch looks at the relative profit if you sell the calves at weaning—this is the maternal side of the equation. \$Feeder just looks at the terminal traits after weaning.

\$Profit looks at the complete cycle, from birth to harvest, and assumes you retain ownership all the way to harvest.

	Good	Better	Best
% Rank:	Average	Top 25%	Top 1%
BW	2.6	0.8	-3.5
